Rent a Car App

Rent a car app enables customers to rent autos between start and end date of their reservation.

ERD

BackEnd Tasks

- Customers;
 - can select start and end date and see the list of available cars on selected dates.
 - can choose a car on the list and reserve that car, but can not reserve more than one car on a selected time period,
 - can see the list of their reservations including past ones.
 - can update reservations, but;
 - can not extend end dates if the car is reserved by other customers on selected time.
 - can delete their reservations.
- Admins;
 - can make CRUD operations on Car table,
 - can make CRUD operations on Customers table,
 - can make CRUD operations on Reservations table,
- There will be filtering, pagination, and sorting capabilities on list views.

😊 **Happy Coding!** 🍌
